HARDWEARING DEERSKIN LEATHER

Deerskin leather is good for drivers' gloves because it is exceptionally soft, flexible, & comfortable, while still being strong & durable. It offers a secure grip, maintains softness even when wet, and provides a high degree of dexterity.

PARA-ARAMID STITCHING is stronger, more durable, & inherently flame resistant

ERGONOMIC KEYSTONE THUMB for articulation & hand control

INSIDE SEAM CONSTRUCTION protects threads from wear & abrasion

SHIRRED ELASTIC WRIST offers a more snug & more comfortable fit
