FABRICATION

PARA-ARAMID CUT & FLAME RESISTANCE

Para-aramid engineered yarns are extremely strong and abrasion resistant. They are lighter than steel, but are 5X stronger on an equal weight basis. In addition to being extremely cut-resistant, para-aramid yarns are inherently flame resistant. They will not ignite, melt, or degrade in heat.

THUMB HOLE keeps sleeve from sliding up while working

DOUBLE LAYER PARA-ARAMID offers Cut Level A4 protection & flame resistance
