

SAFETY INFORMATION

WARNINGS! Read the instructions before use. Use only as a heat-resistant handle cover for cookware. Provides protection against heat but does not make the handle completely cold; always check before gripping. Do not expose to open flames or direct high heat sources. Not suitable for use in ovens or prolonged high-heat exposure. Ensure the cover fits securely on the handle before use to prevent slipping. Keep dry and away from moisture to maintain durability and performance. Inspect before each use. Do not use if damaged, worn, or weakened. Use only for short-term handling of hot cookware handles. Keep out of reach of children.

INSTRUCTIONS FOR USE

Ensure the cover fits snugly but not too tight. Slide it onto the handle only when the pan is cool, covering the grip area fully. Keep it on while cooking for heat protection and better grip. The cover is heat-resistant up to 250 °C (482 °F) but not fireproof, keep it away from open flames. If it gets hot, allow it to cool for 10 – 15 minutes before removing.

CARE & MAINTENANCE

Wipe with a damp cloth for cleaning, avoid soaking. Let it air-dry at room temperature, away from heat sources. Apply a natural leather conditioner periodically to prevent cracking. Over time, the leather will naturally darken and develop wear marks. Store in a dry, ventilated place, avoiding humid or sealed spaces.
