Suction cup B20 Silicone FCM, G1/8" male, with mesh filter

Article number: 9909608

• The silicone material complies with FDA 21 CFR 177.2600 & EU 1935/2004.

- Suitable for level adjustment. Several short bellows in one lifting device can handle objects with height differences and varying shapes, for example embossed or corrugated plates.
- The lifting movement can be used to separate small and thin objects.
- Only lightweight objects should be handled when the lifting force is parallel to the surface of the object, in order to achieve good precision and safe lifting movement.
