

InnoTech Atira drawer assembly and adjustment

Drawer assembly

Place the drawer on the slide and slide it towards the cabinet. Two triggers will secure the drawer to the slide.

Disassembling the drawer

Press the fixing trigger and pull out the drawer. The trigger is easy to find under the drawer. Disassembly of the drawer without tools.

Facade assembly

No tools required. Slide the front mount into the drawer. Push down, click.

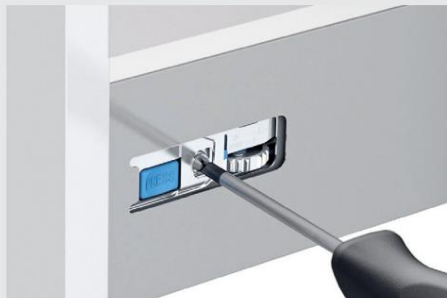

Dismantling the facade

Press the blue button on both sides.

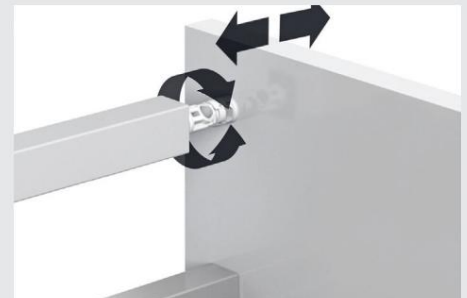

Height adjustment

Height +/- 2 mm. By a manually operated wheel.

Lateral adjustment

Left/Right +/- 1.5mm. By a screw on the right side.

Tilt adjustment

In combination with the rod: Rotate the longitudinal rod.

Fixing the mounting bracket to the drawer

With the drawer placed in its final position, secure the front to the bottom of the drawer with the supplied 4x16 screw and the mounting bracket already placed on the front.
