TASKI® Sani Cid Pur-Eco QS

Acidic washroom cleaner – concentrate

Introduction to Pur-Eco

- Pur-Eco is the solution of choice when combining performance, safety for the user and environmental responsibility.
- All formulations are used at low dosages, limiting the use and disposal of chemicals into the environment and come packed in recyclable material.
- Diversey's expertise environmental commitment and certification against ISO 9001, ISO 14001 and the AISE Charter of Sustainable Cleaning provide further guarantee of quality and efficacy.

Product description

- Acid-based daily washroom cleaner for all acid resistant surfaces. Suitable for any water type condition including hard water areas. Sani Cid Pur-Eco QS is automatically and always precisely diluted through the QuattroSelect unit to guarantee total cost control and safety.
- Sani Cid Pur-Eco QS is formulated with a natural mild acid to minimise the impact on the environment and ensure a safer use.
- Sani Cid Pur-Eco QS fulfils the criteria of the EU 'Flower' and Scandinavian 'NordicSwan' eco-label schemes.

Key properties

- Mildly acidic, based on citric acid
- Gentle formulation for maximum safety of use
- Versatile application with QuattroSelect
- QuattroSelect is a closed lockable unit without access to concentrate
- Uses unique and environmentally friendly pouch technology
- One fragrance for all Pur-Eco range

Benefits

- Natural acid for an effective cleaning and descaling also in hard water areas
- Suitable for use on intact chrome and stainless steel fixtures
- Leaves a pleasant scent in all cleaned areas
- QuattroSelect dispenses high flow and low flow which makes it suitable for use in wet mopping systems and also above floor surfaces
- Maximum employee and customer safety
- Light weight QuattroSelect pouch offers excellent packaging environmental profile

TASKI® Sani Cid Pur-Eco QS

Use instructions

Dosage: The product can only be used through the QuattroSelect dilution unit, which guarantees 100% cost control and safety.

For use of spray method: 1%, for use of bucket method: 0.3%

Please refer to the QuattroSelect unit installation manual for selecting the right dilution tip.

Application

Point the yellow QuattroSelect unit valve to the quadrant, which corresponds to the right product and application.

Spray application: Fill the spray bottle from the low flow eductor, spray the solution on a damp cloth and wipe. Rinse or replace cloth regularly. Use a sponge pad to remove stubborn soil.

Bucket method: Fill the cloth bucket using the high flow deductor through the filling gun. Apply the solution with a cloth/sponge and wipe. Use a sponge pad to remove stubborn soil.

Wet mopping: Fill the mop bucket using the high flow deductor through the filling gun. Apply the solution with a mop and remove the soiled solution.

Important: Do not use on acid-sensitive surfaces like marble, terrazzo, travertine and other calcareous surfaces. Test material compatibility in a small, inconspicuous place before use.

Technical data

Appearance	Clear, red coloured liquid	pH-value neat	1.0 -2.0
Relative density (20°C)	1.05		

The above data is typical of normal production and should not be taken as a specification.
