

The Diversey logo features the brand name in a white serif font inside a dark blue oval shape. To the right of the text is a stylized white leaf icon. A small 'TM' trademark symbol is positioned at the top right of the oval.

Diversey™

TASKI® Jonmaster Ultra Dry Mop

Product Descriptor

Key features

- Highest quality microfibre material
- Excellent cleaning performance
- Effective bacteria and spore removal

Benefits

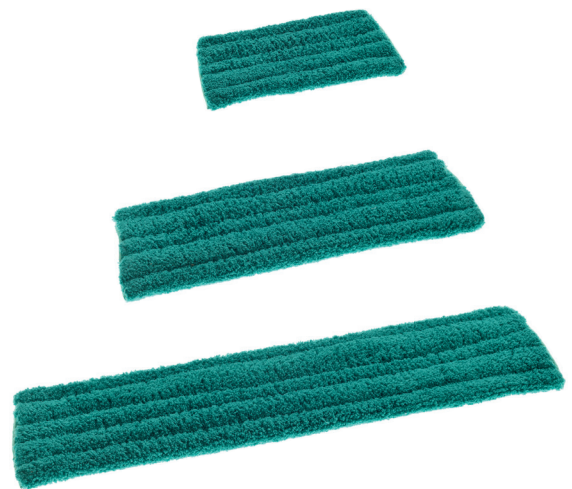

- Extended lifetime
- Highest ever efficiency and m2-productivity
- Hygiene security

Description

The TASKI Jonmaster Ultra Dry Mop is especially developed for dry mopping in areas which are cleaned often and where dry mopping can replace damp or wet mopping. The new and improved premium dry mop is made from 100% nest ultra microfibre. The extra fine loops allow the mop to collect significantly more dirt and dust particles from the floor. All mops provide optimal glide and soil pick-up properties for minimal operator fatigue and high m2-performance. The mops are guaranteed for 800 uses and washes provided the instructions specified by Diversey are followed.

Instructions for use

The TASKI Jonmaster Ultra Dry mop is always used dry, entirely without water. Press the required TASKI Jonmaster Mop Frame against the backing of the TASKI Jonmaster Ultra Dry Mop. The Velcro panel immediately attaches the mop to the mop frame. Start mopping along the skirting board and then work inwards. Mop with circular motion, overlapping generously to not miss anything. Do not lift the mop from the floor when mopping or turning. Do not push the mop down against the floor either. After use remove the mop from the mop frame with a quick pull of the mop tab and dispose in the laundry bag.

TASKI® Jonmaster Ultra Dry Mop

Please note:

- Suitable for all types of hard flat floor surfaces
- Suitable for floors with a need for hygiene and cleanliness
- Avoid using softeners and detergents containing bleach

The TASKI Jonmaster Ultra Cloth also carries the Nordic Swan Ecolabelling. Nordic Ecolabelled fabric cleaning products containing microfibres, for professional use, are amongst the least environmentally harmful in their group. The products fulfill stringent requirements on the health and environmental characteristics of constituent materials as well as quality and performance.

Nordic Ecolabelled fabric cleaning products, containing microfibres, for professional use:

- Offer first-rate cleaning performance.
- Are durable (providing a long service life).
- Contribute to lowering emissions to water and the air.
- Are gentle on the surface being cleaned.
