

Diversey™

TASKI® Contact Pads

For better maintenance cleaning

Key advantages

- One pad for all floors
- Fits TASKI machines
- Easy and simple to use

Benefits

- Saves time by using only one pad
- Up to three times longer lifetime

Information

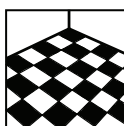

TASKI Contact Pads are for high quality maintenance cleaning on all water resistant floors. The active fibres loosen pore-deep dirt by separation, not through abrasive scrubbing action.

Simple and easy to use as only one pad is needed for all smooth, rough and structured floors. Even with low product dosing, TASKI Contact Pads effortlessly remove water soluble and greasy dirt from tile floors with grouting and from structured floors.

On structured floors, the TASKI Contact Pad is a genuine problem solver. All structures are cleaned on the surface as well as horizontally and vertically.

Use instructions

The contact pad can be used on all different types of TASKI machines on all water resistant floors
