TASKI® UltraPlus Interior Mop & Handle

Key features

- Adjustable mop frame shape
- Soft rubber grip
- Unique click-fit
- Highest quality microfibre material

Benefits

- Excellent reach
- Ergonomic and comfortable mopping
- Compatible with all TASKI UltraPlus handles
- Outstanding dust removal

Description

The TASKI UltraPlus Interior Mop Handle has been especially designed for the professional Jonmaster system. The robust handle is the perfect tool for dusting of small spaces and hard-to-reach surfaces such as bookshelves, lamps, radiators and pipes.

The mop frame can easily be bent into suitable shapes and then easily adjusted back into its original flat shape. The mop frame is compatible with all TASKI UltraPlus handles to provide access to those hard to reach areas. Thanks to the comfortable soft rubber handle grip, with its ergonomic design, handling is very user friendly.

In addition the fine looped fibres of the microfibre mop sleeve provide excellent dust, dirt and hair pick-up.
