

TASKI Standard HD Damp Mop ECO

Key features

- Good quality, patented microfibre material
- Nordic Swan 3.0 certified
- High dust and dirt pick-up properties
- Excellent glide properties

Advantages

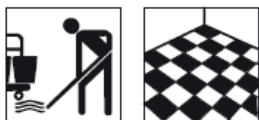

- Good mop durability
- Great cleaning performance in high traffic areas
- High efficiency and m2-productivity

Description

Each TASKI Standard HD Damp Mop ECO is carefully manufactured with quality materials and guarantees great cleaning results. All mops provide optimal glide and soil pick-up properties for minimal operator fatigue, high m2-performance whilst delivering good cleaning standards.

Using partly recycled microfibres, using the TASKI Standard HD Damp Mop ECO will help you reduce the environmental impact of your cleaning, while maintaining excellent hygiene standards, proven by the Nordic Swan 3.0 certification.

The mops are guaranteed a minimum of 300 wash cycles provided the use instructions specified by Diversey are followed. The TASKI Standard HD Damp Mop ECO is especially developed for direct mopping of smooth and structured hard floors with a normal to high dirt level. The traditional looped fringes enable the mop to collect and trap larger loose dirt particles. The microfibres make it easy to penetrate at a finer level than normal fibres, removing more dirt and grease.

TASKI Standard HD Damp Mop ECO

Instructions for use

It is recommended to use the TASKI Standard HD Damp Mop ECO damp with 150% of its own weight of moisture to assure the best cleaning effect - removing the need for a second drying pass. The area can therefore be opened to traffic soon after cleaning! When using the TASKI Standard HD Damp Mop ECO, fine fibres create a capillary effect within the mop that collects and removes dirt, grease and dust particles from the surface - removing the need for a second drying pass. For these particles to be removed completely the mop needs to be well-rinsed and laundered.

Caring for your mop

- Always pre-wash or rinse the mop without detergent
- Do not launder together with other textiles
- Do not use any bleach, softener or highly alkaline laundry product
- Please take care that using too high drying temperatures or over drying causes thermal damage to the fibres

The TASKI Standard HD Damp Mop ECO carries the Nordic Swan 3.0 Ecolabelling. Nordic Ecolabelled fabric cleaning products containing microfibres, for professional use, are amongst the least environmentally harmful in their group. The products fulfil stringent requirements on the health and environmental characteristics of constituent materials as well as quality and performance:

- Offer first-rate cleaning performance
- Are durable (providing a long service life)
- Contribute to lowering emissions to water and the air
- Are gentle on the surface being cleaned

Technical Data

Material mop	40% Recycled PES / 45% PES / 15% Cotton	Drying	Dry at 40°C (max)
Size mop 40	11 × 45/49 cm (plus/minus 1 cm)	Durability	Washable 300 times at 60°C (max)
Size mop 60	11 × 66/70 cm (plus/minus 1 cm)	Washing	Machine wash at 95°C (max)
Colour	Blue & white		

The above data are typical of normal production and should not be considered specifications.
