

Tower Self-Adhesive Tissue Case

PRODUCT NUMBER 05587:WH 05588:BK

INSTRUCTIONS Thank you for purchasing this item from Yamazaki Inc. Please refer to the following instructions before using the product. Please use it properly, and take good care of it.

Please refer to the separate film hook instruction manual for how to attach, how to remove, how to care for, and precautions for use of the film hooks.

■How to attach

① **Attach it to the wall so that the distance between the two film hooks is 6.3 cm.**

***This product can be mounted either vertically or horizontally, but please note the direction of the film hooks.**

(Please refer to the diagram below.)

② **Please firmly insert the main unit into the film hook until it clicks into place.**

*The two film hooks should be attached vertically and horizontally to each other.

If the film hook is not correctly attached, the unit cannot be mounted.

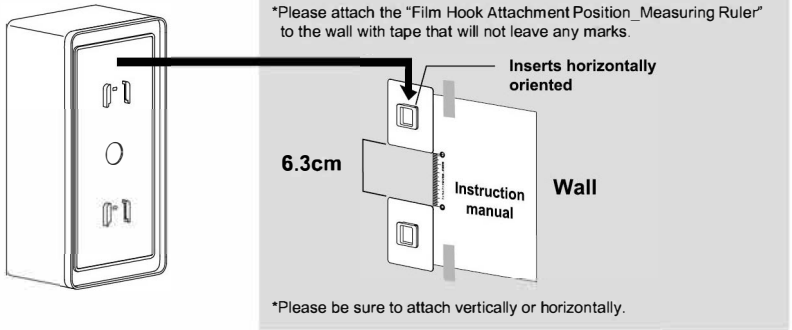

*Please be careful not to try to forcibly mount the main unit, as this may result in damage to the unit.

*Do not attach the product to the wall with the film hook attached to the main unit.

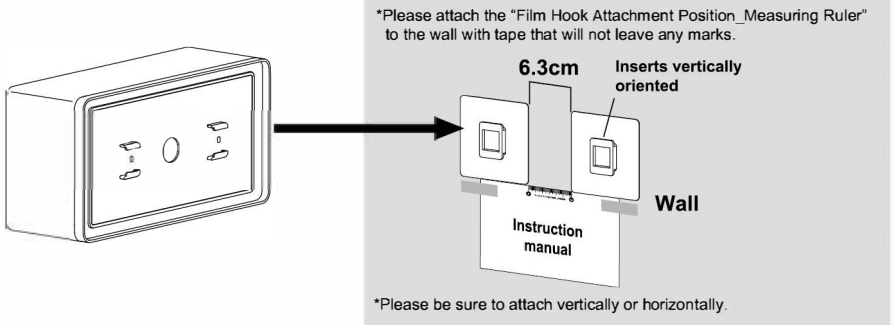

The product may drop off due to the film hook not being attached correctly.

*Please do not use a single film hook. Please be sure to use two film hooks.

[Mounting vertically]

[Mounting horizontally]

DESIGNED IN JAPAN / MADE IN CHINA

Ruler for measuring position of film hook

■How to use

- ① Hook your finger in the hole on the back of the pedestal of the product main unit and remove the pedestal from the main unit.
- Store the tissue box between the main unit and the pedestal as shown on the diagram on the right.
- ③ Please firmly fit the main unit into the pedestal.
*The main unit can be removed by hooking your finger into the tissue removal hole on the main unit even while the pedestal is still attached to the film hook.

*The illustration may differ slightly from the actual product.

Precautions For Use

Please be aware that all of the following can cause falls or injury as well as damage, deformation, rust, or deterioration of the contact surface.

- Please do not use the product in a way other than its intended use.
- Film hooks should be attached to a glossy, flat surface with no unevenness.
- After attaching the film hook, please make sure that the film hook is firmly adhered before use.
- Dirt, dust, or the like on the wall or on the film's contact surface will prevent the film hook from attaching. Please make sure the contact surface is clean before attaching the film hook.
- Do not place valuable, fragile, or dangerous items in the storage area.
- Some items cannot be placed on the shelf depending on the size and shape of the items you want to place.
- Do not store anything over the load capacity.
- Even within the weight limit, a large impact can cause the hook to fall, causing injury or damage, so please take caution.
- **The weight limit and adhesive strength may slightly vary depending on the surface finish, material, condition, coating, strength, or environment.**
- **We cannot be held responsible for damages caused by uncontrollable events such as natural disasters or incorrect usage, or for product defects caused by incorrect installation.**
- Do not place this product in an area with direct sunlight, proximity to fire, or high temperatures.
- If left in the same spot for a long time, mold, slime, or discoloration may occur on the wall under the film hook, so please clean the connecting surface of the film hook and wall once every few months and reattach.
- The film hook can deteriorate or be damaged with long term use. Please stop using the product if any irregularities are noticed during use.
- Please do not allow hot water over 60 °C to come into contact with the film hook or leave it wet.

How To Clean

- If the product gets dirty, wash it with neutral detergent and wipe it dry well before use.
- Please wash the front and adhesive surface of the film hook with water by rubbing lightly with your fingers and dry well. Do not use detergent.
- Please be careful not to scrub with a scouring brush or polishing powder, etc., as this may cause scratches.
- Do not use chemicals such as mold removers or bleaches or solvents such as benzene or thinner when cleaning the film hook or contact area of the wall.
